### WOMEN AT STATE FAIR

For the second time in the history of the Kentucky State Fair a Woman's Shop is to be a part of same this year. This Department was inaugurated last year and was found to be such an attractive one that a continuation and enlargement of this phase of exhibits, that of placing woman's handiwork before the buying public, was thought to be wise.

In the Woman's Department articles of women's handiwork in textiles, art and cookery are exhibited in competition for prizes. The Woman's Shop is intended to give an opportunity to the ladies of the state to exhibit their handiwork for sale. A small commission will be charged but only on articles sold.

All articles sent to the Woman's Shop will be taken care of to the best ability of a corps of efficient ladies in charge and the public who are attracted to the Fair will have an opportunity of purchasing something at a moderate price and that something the handiwork of the home-makers of our state. Articles ranging from quilts to baby caps and handkerchiefs as well as beautiful things in art will be on sale here. While some of the beautiful things that were exhibited last year were not sold, yet the names of the makers were taken by the visitors and orders could be given later. The idea of this Department is that the women in the home may have an opportunity to present their work to the buying public through the channels of the State Fair, their fair, your fair, our fair. Won't you take part in same?

Those who have not received a catalog of the Kentucky State Fair can receive one by sending their name and address to W. J. Gooch, Secretary, Louisville, Ky.

### KENTUCKY CROP REPORT AS OF JULY 1st, 1916

The last of June found everybody busy on the farm. The late corn is scarcely laid by, the early corn needs cultivation, threshing has begun in many localities, wheat, barley, rye and hay harvest is on hand and the length of no day is sufficient for the Kentucky farmer at this time.

Excessive rainfall over a large area of the state during June has prevented the proper cultivation of the crops, and in consequence the growth of same is retarded by weeds and grass. Pastures are in good condition. This month's reports show great contrasts as to weather and crop conditions from different sections of the state.

Threshing is in full sway, and while only a part of the wheat has been threshed, it is estimated that a very small yield will be the result. This yield is estimated at 10 bushels per acre. Oats have done much better and show a yield of 20 bushels per acre, rye is given at 11 bushels and barley at 17 bushels per acre as a state average.

Corn is reported as looking well and with seasonable weather this crop bids fair to be a good one. Condition of same is given at 87 per cent.

Tobacco as a whole is doing well though some complaint is made of blight on the plants. The condition of burley is given at 87 per cent., while dark tobacco shows at 90 per cent.

A large increase in acreage of hemp is reported this year and the condition of this crop is given at 97 per cent.

Garden conditions are good and the estimate on same is given at 94 per cent.

Soy beans show an acreage of 87 per cent., while cow peas show acreage of 86 per cent. and condition of 87 per cent.

The condition of live stock is good. While hog cholera is reported

as being prevalent in some localities, no heavy losses have been sustained, due to the fact that anti-hog cholera serum is being more generally used and more attention is being paid to the feeding of hogs and the sanitary conditions surrounding them. The average condition of live stock is as follows: Horses, 94 per cent.; cattle, 96 per cent.; hogs, 93 per cent.; sheep, 95 per cent.; chickens, 93 per cent.; turkeys, 84 per cent.; ducks, 94 per cent.

A shortage of Blue Grass seed is reported. The condition of Blue Grass is given at 81 per cent.; clover, 92 per cent.; orchard grass, 91 per cent., and alfalfa, 94 per cent. The first cutting of alfalfa gives an average yield for the state of 1.47 tons per acre. In some localities much of the first cutting was lost owing to the heavy rains immediately after cutting.

Conditions of fruits are not satisfactory with the exception of the blackberry crop, which is said to be the largest in years. Apples are falling off badly. Condition of apples is given at 71 per cent.; peaches, 71 per cent.; pears, 68 per cent.; plums, 78 per cent.; grapes, 92 per cent., and blackberries, 99 per cent.

In summing up the report there is every probability of good crops of corn and tobacco. Farmers are urged to continue the cultivation of the growing crops. Seasonable weather from now on will yet make this year a profitable one to the farmers of Kentucky.
